

# H+M Pendant

Design: Christian Hvidt Design

The H+M series is characterised by its simplicity in form and function, a simplicity that gives room for other design details; the H+M luminaires perfectly enhance the simplicity or blend into the preferred style.

The series comprises fixtures for recession or surface-mounting as well as pendants in two sizes: Ø300 and Ø380 mm. The three types are similar in construction and use the same lamp types. They are easy to install and maintain and offer optimum safety.

The screen is impact-resistant, flame-proof polycarbonate rests loose in the edge and can be tipped out for cleaning.
