

Peak 320

Simple. Adaptive. Multifunctional.

Product: Peak 320

Design: AART Designers

"Peak 320 was developed with the vision of delivering a compact, adaptable, and high-performance luminaire-engineered to fulfill future requirements for durable and contemporary lighting through a robust and refined design."

Morten Hove Lasthein AART Designers

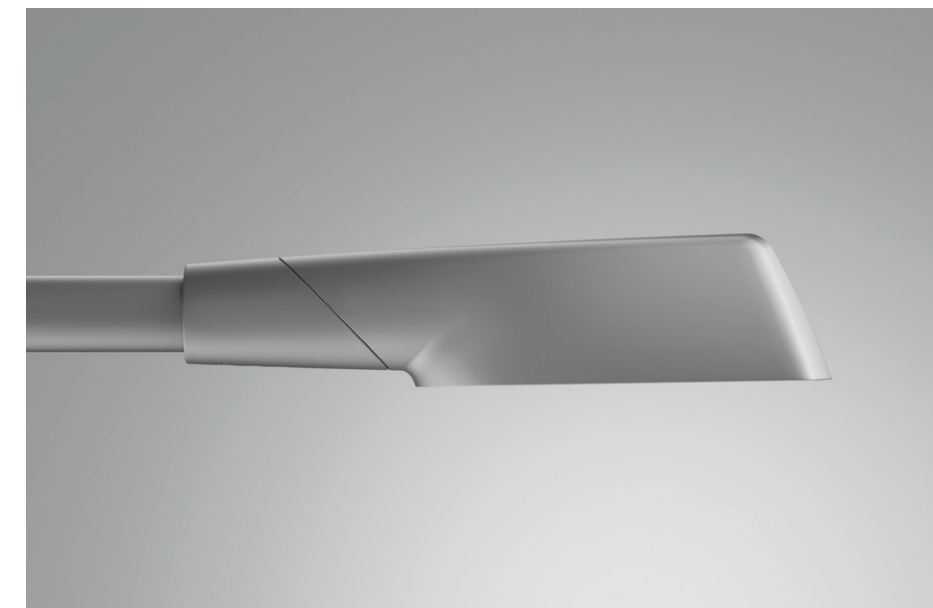

Versatile, efficient, and elegantly simple. Peak 320 is a multifunctional luminaire designed to set new standards with a simple and flexible design. Its 2-in-1 mounting system ensures flexible installations for both pole and arm, offering a cohesive lighting solution for any setting.

The luminaire is engineered and designed for easy and effective maintenance, and it delivers powerful and efficient lighting distribution while being Dark Sky compliant with Zero Uplight.

With its clean lines and balanced design, Peak 320 is a perfect fit for a wide range of urban settings.

PEAK 320

Peak 320

Key benefits

Aesthetic and functional design

- Smooth and elegant design
- 2-in-1 multifunctional installation (pole and arm)
- Tailored to fit poles ranging from 3 to 7 meters
- A white reflector designed to improve visual comfort
- Zhaga D4i socket for Smart City integration on top and bottom

Light distribution

- LED 2700, 3000 and 4000K
- Effective and direct light distribution
- Recessed glass and LED board for reduced glare and improved comfort
- Dark Sky Compliant
- Zero Uplight

Surface and flexibility

- Easy service and modular components
- Designed for high corrosion protection
- High quality aluminium
- C4 and C5 tested surfaces
- Raw Anodized surface
- Various colors

Warranty and guarantee

- 5 years product warranty
- 25 years service guarantee
- 50 years of proven quality and flexibility

2 in 1

Multifunctional installation

Peak 320 is designed to stand out with its multifunctional and adaptable shape that fits both arm and pole installations. A key feature is the built-in swivel joint, which allows the head of the luminaire to tilt up to 90°. This gives great flexibility during installation and allows the setup to be changed without needing new equipment. Whether used on arm or post top, Peak 320 adapts effortlessly.

The circular detail at the base ensures a smooth and elegant connection to both round poles and arms – completing the design language that defines the Peak family.

1 Release. 2 Open. 3 Service.

Effortless maintenance — just one screw away

Peak 320 is designed for easy maintenance, as it offers quick and convenient access to the light components from below. The glass is released with a single screw and opens downward, ensuring ergonomic access. A rear hinge guides the opening and keeps the glass securely in place during maintenance. At the same time, the fixture features a solid and weather-resistant construction, designed to withstand even the harshest environments, and ensure effective water drainage.

Inspired by the original Peak 380
